SUMMARY

Results-driven Python Backend Engineer with 4+ years of experience building scalable web applications, IoT-integrated systems, and high-performance APIs. Strong expertise in Django, Flask, and FastAPI, with a focus on microservices, data pipelines, and system scalability. Proven ability to optimize backend performance, design robust architectures, and deliver production-ready solutions.

SKILLS

Languages & Frameworks: Python, Django, Flask, FastAPI

Backend & Architecture: REST APIs, Microservices, System Design Basics

Databases: PostgreSQL, MySQL, MongoDB, Redis, ElasticSearch

Cloud & DevOps: AWS (S3)

Data & Messaging: MQTT, Modbus

Tools: Git, Linux, PyInstaller, nginx

EXPERIENCE

Software Engineer | Rockwell Automation | 2022 – Present

- Developed Flask-based applications for real-time pollutant monitoring, improving data visibility by **40%**
- Built scalable data ingestion pipelines handling IoT data from MQTT, Modbus, APIs, and file systems
- Optimized database queries across PostgreSQL, MongoDB, and ElasticSearch, reducing response time by **30%**
- Designed backend systems for high-frequency data processing and real-time analytics
- Implemented configuration-driven architecture, reducing deployment time by **30%**
- Deployed applications on Linux (CentOS) environments using PyInstaller
- Collaborated with cross-functional teams to gather requirements and deliver scalable solutions

PROJECTS

Scalable Scheduling & Meeting Automation System

- Built secure REST APIs using FastAPI with token-based authentication (JWT)
- Automated meeting scheduling with Zoom API integration and email notifications
- Designed backend workflow to handle concurrent scheduling requests efficiently

Mini Chatbot

- Built a mini-chatbot using Django and Gemini! Excited to explore the potential of AI in creating engaging user experience
-

EDUCATION

B.E. Electronics and Communication Engineering
Jayalakshmi Institute of Technology | 2017 – 2021

CERTIFICATIONS

- Python Django Dev to Deployment – Udemy
-

ADDITIONAL

- Strong problem-solving and debugging skills
- Passionate about scalable backend systems and clean architecture
