EDUCATION

Bachelor of engineering in Electronics (ECE)

May 2017 - August 2021

- Jayalakshmi institute of technology ,Dharmapuri

SKILLS

- Time management
- Communication
- Critical thinking
- Analytics
- Communication
- Project management
- Django
- Flask
- FastAPI
- PostgreSQL
- MySQL
- Pandas
- MQTT
- Modbus
- GenAI(Gemini)
- OpenCV

ACHIEVEMENTS

AWARDS

Received the Star of the month "Extra Mile Award" for December 2023

CERTIFICATION

Python Django Dev to Deployment - Issued by Udemey

WORK EXPERIENCE

Knowledgelens A Rockwell Automation Company

Bengaluru
2022-2024

Software Engineer

GLens Engg Acquisition

Experience developing Flask-based applications to collect and visualize pollutant parameter data from a database, creating interactive dashboards.

- Data Acquisition:** Proficient in gathering data from diverse sources (MQTT, Modbus, file systems, APIs) and integrating with Raspberry Pi-based dataloggers.
- Data Processing:** Experienced in developing Python applications to process and transform data for analysis and visualization.
- Database Management:** Skilled in managing and migrating data across MySQL, MSSQL, PostgreSQL, and MongoDB databases.
- Application Development:** Expertise in building configuration-based Python applications, creating installers, and deploying on CentOS using PyInstaller.
- Visualization:** Proficient in developing GUI applications using Tkinter for data display.
- System Integration:** Knowledge of MQTT protocols and EMQX dashboard for real-time data management.
- Requirement Analysis:** Capable of understanding and implementing new requirements from external stakeholders.

GenAI

Developed gemini based chat bot using django and gemini API

- Django backend:** Handles user interactions, stores conversation history, and manages the chatbot's logic.
- Gemini API integration:** Enables the chatbot to access Gemini's advanced language capabilities for understanding and responding to user queries.
- Natural language processing:** Allows the chatbot to interpret user input and generate human-like text responses.
- User interface:** Provides a platform for users to interact with the chatbot, potentially through a web-based application.
